SUMMARY

CS undergraduate (graduating 2026) who ships full-stack products end-to-end — React frontends, Node/Express APIs, MongoDB/MySQL databases. Comfortable moving fast in ambiguous environments, writing clean component-driven code, and owning features from design to deployment. Looking to join a scrappy startup where ownership matters.

TECHNICAL SKILLS

Frontend	React.js, Next.js, HTML5, CSS3, JavaScript (ES6+), Responsive Design
Backend	Node.js, Express.js, PHP, RESTful API, JWT Auth, Rate Limiting, RBAC
Databases	MongoDB, MySQL
Tools	Git, Cloudinary, VS Code, Cisco Packet Tracer · Languages: JS, Python, C++

PROJECTS

Sportrix — Sports Management & Community Platform *2026*
React.js · Node.js · Express.js · MongoDB · JWT · Cloudinary

- Architected 8+ reusable React components, cutting future feature dev time ~40%; delivered fully responsive layouts across 5 breakpoints without a CSS framework.
- Built secure REST API with JWT auth, rate limiting, and RBAC; integrated Cloudinary via Multer for scalable document uploads.

Student Admission Automate Form System *2026*
React.js · Node.js · MongoDB · Cloudinary · Multi-step Form

- Built a multi-step admission form with field validation and glass morphism UI; engineered a secure backend with Mongoose schemas and Cloudinary document storage.

Personal Portfolio Website *2023*
React.js · Framer Motion · Rest API

- Launched a pixel-perfect portfolio in under 72 hours with Framer Motion animations and canvas particle background; zero layout issues across 4 major browsers.

Food Recipe Website · Student Management System · Tic-Tac-Toe *2023*

- Dynamic DOM-manipulation recipe UI (20+ cards); MySQL-backed CRUD system for 100+ records; two-player game with full win-condition logic in 200 lines of clean C++.

EDUCATION

BS Computer Science — University of Agriculture Faisalabad *2022 – 2026*
Coursework: Data Structures & Algorithms, Database Systems, Web Engineering, Computer Networks, Software Engineering · Supplementing with online MERN Stack courses.
