ZAIN UL ABIDEEN

Full-Stack Developer | MERN Stack Developer

Lahore, Pakistan | +92-325-1575822 | zainrana.dev@gmail.com
GitHub | Portfolio

PROFESSIONAL SUMMARY

Final-year BS Computer Science student with hands-on experience building scalable full-stack web applications using the MERN stack. Strong foundation in React, Node.js, Express.js, MongoDB, REST APIs, authentication, and modern frontend development. Passionate about creating responsive, high-performance applications with clean architecture and reusable components.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, C++
Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap, Framer Motion, Responsive Design
Backend: Node.js, Express.js, REST APIs, JWT Authentication, Role-Based Access Control (RBAC), Rate Limiting
Databases: MongoDB, MySQL, PostgreSQL
Tools: Git, GitHub, Cloudinary, Socket.io, Vercel, Render, Postman, VS Code

PROJECTS

Sportrix — AI-Powered Sports Club & Tournament Management Platform *React.js · Node.js · Express.js · MongoDB · Socket.io · Google Gemini AI · JWT · Cloudinary*

- Built a full-stack sports management platform (Final Year Project) with secure JWT authentication and role-based authorization for clubs, players, and organizers.
- Implemented real-time tournament scoring and live event updates using Socket.io for low-latency, bidirectional communication.
- Integrated Google Gemini AI for AI-generated match reports and a streaming chatbot assistant.
- Designed RESTful APIs for players, clubs, tournaments, and event management, with Cloudinary for secure, optimized media uploads, and reusable responsive React components across devices.

TeamFlow — Real-Time Team Task Board *React · Node.js · Express.js · MongoDB · Socket.io · Tailwind CSS*

- Built a real-time collaborative Kanban board with live synchronization across clients using Socket.io.
- Implemented drag-and-drop task management with optimistic UI updates for a responsive user experience.
- Designed secure REST APIs for boards, lists, and cards, with JWT authentication and role-based access for team collaboration.

Student Admission Automation System *React.js · Node.js · MongoDB · Cloudinary*

- Developed a secure multi-step admission portal with real-time form validation.
- Built scalable backend APIs using Express.js and Mongoose.
- Integrated Cloudinary for document uploads and improved UX with structured, responsive form workflows.

SMALL PROJECTS

Meme Generator *React.js · Imgflip API · Tailwind CSS | live preview :* Memegenie

- Responsive meme generator with dynamic template fetching from the Imgflip API, custom text overlays, real-time preview, and image download.

Weather Dashboard *React.js · OpenWeather API · Tailwind CSS*

- Weather app showing live conditions and forecasts via the OpenWeather REST API, with location-based search and invalid-location error handling.

Password Generator *JavaScript · HTML5 · Tailwind CSS*

- Customizable password generator with configurable length/character sets, a strength indicator, and clipboard copy.

Multitask Calculator *JavaScript · HTML5 · Tailwind CSS | live preview :* Multitask-Calculator

- Responsive calculator supporting standard arithmetic, keyboard input, and input validation.

To-Do List Application *JavaScript · HTML5 · Tailwind CSS | live preview :* Taskleader

- Task manager with create, edit, delete, search, and completion tracking, persisting data via Local Storage.

EXPERIENCE

Full Stack Developer Intern — Spadasoft *lahore, Pakistan*

- Developed frontend features using React, Tailwind CSS, and Figma-based designs, contributing to a reusable component library.
- Built and maintained a corporate portfolio site, translating design mockups into responsive, production-ready components.

EDUCATION

Bachelor of Science in Computer Science
University of Agriculture, Faisalabad | 2022 – 2026
Relevant Coursework: Data Structures & Algorithms, Database Systems, Web Engineering, Software Engineering, Computer Networks
